

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

Applicant:	Kirk Knowlton <i>et al.</i>	Art Unit:	1618
Application No.:	10/591,092	Examiner:	Jones, Dameron L.
Filing Date:	July 12, 2007	Conf. No.:	7890
Title:	METHOD AND MATERIALS FOR USE IN DIAGNOSING VIRAL MYOCARDITIS		

**MAIL STOP AMENDMENT**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

**RESPONSE TO RESTRICTION REQUIREMENT**

Sir:

Responsive to the Restriction Requirement mailed September 30, 2009, Applicants elect, without traverse, the claims of **Group II** (claims 7-13, 20-26, and 28-30), drawn to a method (and kit thereof) for detecting an enteroviral infection *in vitro*. In regard to the claims for inclusion in Group II, we assume that the reference to claims "7-13, 20-25, and 7-30" at paragraph 1 of the Action was meant to refer to claims 7-13, 20-26, and 28-30.

Applicants further elect, with traverse, the species of Claim 2, a dystrophin cleavage product produced by enteroviral protease 2A cleavage of the rod domain of dystrophin for the species election. Applicants submit that claims 7-13, 20-26, and 28-30 read on the elected species.
